

Topic:

Some people think that examinations have some bad effects on students. Some people say they have some good effects on education. Discuss both sides and give your opinion.

From primary school to university, students have to take a lot of examinations every year. Some people take the view that examinations are detrimental to students in many aspects. However, there are also many people who hold the opinion that examinations have beneficial impacts on education. It is quite natural that people from different backgrounds have different attitudes towards the same issue.

Those who believe that examinations have negative influences on students give their reasons as follows. First of all, examinations are harmful to students' physical health. It goes without saying that accepted that because students spend too much time preparing examinations, they often ignore outdoor activities and physical exercises. Another reason is that examinations can easily lead to students' psychological problems. In other words, students face fierce competition and suffer from great pressure. Some of them may even choose to commit suicide, although this is rare.

However, the other side of the coin voices its strong opposition, saying that examinations play an essential role in education. For one thing, examinations bring us great convenience and efficiency. There is no denying that examinations are a convenient and efficient way to measure students' knowledge and ability. For another thing, up to now, no other methods have been discovered to replace examinations. That is to say, examinations are still regarded as the only reliable and feasible method which we can take. Other methods are too time-consuming and therefore they are infeasible.

In my opinion, I would agree with the latter view that examinations have positive effects on education. With examinations, we can evaluate students' ability conveniently and efficiently. What is more, nowadays we have not found out other methods which can replace examinations.

(_____.) Some people take the view that _____. However, there are also many people who hold the opinion that _____. It is quite natural that people from different backgrounds have different attitudes towards the same issue.

Those who believe that _____ give
their reasons as follows. First of all,
_____. It goes without saying that
_____. Another reason is that
_____. In other words, _____.

However, the other side of the coin voices its strong opposition, saying that _____.
For one thing, _____. There is no denying that _____. For another thing, _____. That is to say, _____.

In my opinion, I would agree with the latter view
that _____ . _____ .
What is more, _____ .

From primary school to university, students have to take a lot of examinations every year.

Examinations are detrimental to students in many aspects.
