

Is there anything which needs to be improved in your flat?

Well, I have always been thinking about refurnishing my flat, changing a new set of furniture. It will put me in a good mood.

Is there anything which needs to be improved in your flat?

I can't come up with any particular thing needs to be improved. Everything is perfect and it can give me a sense of belonging.

I believe that in terms of a living place, it is not important how spacious or luxurious it is, it is important with whom I am in the place.

In terms of a meal, it is not important what I have for the meal, it is important with whom I have the meal.

In terms of traveling, it is not important where the destination is, it is important what scenery I can enjoy on the way and what mood I am in.

In your family, who does the housework?

My mom does most of the housework. It is not like that my father and I don't want to help or something. It is just that we are both up to our necks in study and work, which leaves us no time and no energy to do it. I think my mom definitely deserves the title of "Mom of the year".

In your family, who makes the final decisions about things?

Well, it is pretty democratic in my family. Everybody has the right to speak their minds and make their own decisions. When it comes to my big issues, my parents always tell me, "It is your decision to make." "You have the final call."

Colors

What kind of colors do you love more, light colors or dark colors, why?

Light colors appeal to me more because I totally believe colors speak one's personality. Take me as an example, I love light colors, and I am sparkling and vibrant.

What kind of color did you love before?

When I was little, I was a big fan of pink, especially baby pink. But now, I don't fancy pink anymore. I think it is too girly and a little bit corny.

What kind of colors do young guys love?

Well, it totally depends on their personality. If they are vibrant and sparkling, they might fancy eye-catching colors like burnt red, Barbie pink and metallic blue; while if they are mature and low-key, dark colors might appeal to them more.

What is the color that you would never use in your flat?

Black is the very last color I would use in my flat. It is too dark, too depressing and too unacceptable. I can't imagine living in a flat with all the black walls. It would freak me out!

谢谢
